

## Sustainability in Action: Our Journey Towards a Greener Future

Pleased to announce a significant advancement in our sustainability initiatives. In fiscal year 2024-25, we have achieved a remarkable 47.36% reduction in our carbon emission intensity (per rupee turnover) (CO<sub>2</sub>e) compared to our fiscal year 2019-20 baseline.

	2019	2024
Scope 1 (Metric Tonnes)	139.00	171.00
Scope 2	0	0

This progress is the result of our comprehensive approach, which includes:

- ✓ The majority of energy is sourced from hydroelectric power grids.
- ✓ Installed 400 kilowatt-hour (kWh) solar panels.
- ✓ Transitioned lighting system through LED lighting across all facilities.
- ✓ Making strategic updates, installed High-efficiency motors and compressors.
- ✓ Transitioning to battery-operated vehicles, minimizing reliance on traditional power sources.
- ✓ Installed Automatic Power Factor Controllers (APFC) to reduce energy bills.
- ✓ Wooden packing materials are replaced with eco-friendly alternatives.
- ✓ Deepening our commitment to nature through Tree plantation.

We remain dedicated to sustainable growth, environmental responsibility, and creating a more sustainable future.
